Introduction

FPV Race Timer – Stay Focused, Fly Faster!

Take your FPV racing to the next level with **FPV Race Timer**, a free and convenient race management tool that eliminates the need for expensive timing equipment. Stay informed, stay ready, and race with confidence!

Key Features:

- **Touch-Responsive Controls** – Buttons turn green when pressed for clear visual feedback.
- **Audible Race Commands** – Stay aware with voice announcements throughout the race.
- **Customizable Pre-Race Prep** – Adjust pre-race commands for more (or less) time to get ready.
- **Dynamic Voice Selection** – Change the race voice in the Settings app under *Accessibility* → *Spoken Content* → *Voices* to suit your preference.
- **Unpredictable Start Timing** – A random delay (up to 10 sec) keeps races fair and exciting.
- **Simple & Intuitive Controls** – Start, pause, and reset with ease:
 - **Play:** Start or restart the timer.
 - **Pause:** Stop the clock without resetting.
 - **Stop/Reset:** Instantly reset the timer to 2:00.
- **Pause Announcements** – Get notified when the timer is paused or resumed.
- **Fair Restarts** – Resuming from pause includes a random countdown before the race continues.

- **Bluetooth Speaker Support** – Connect to an external speaker for louder, clearer race commands, ensuring every pilot hears crucial countdowns and race updates.

With **FPV Race Timer**, pilots can enjoy organized and competitive racing—without the cost of specialized race equipment. Download now and start racing for free!

Configuring the Race

Click the gear icon to navigate to the Settings view. The Settings view allows you to select or de-select audible pre-race commands, as well as some in-app purchase options that you may be interested in.

Starting the Race

To start the race, press the PLAY button. This will start the race, beginning with pre-race announcements. If the race is paused, it will start the race in the same timer location as it was when the race was paused. Like starting the race from the beginning, there will be a random delay prior to the tone so pilots can't easily anticipate the tone.

Pausing the Race

To pause the race, press the PAUSE button. This will stop the race timer without resetting it.

You might want to pause the race to allow a pilot who crashed to retrieve their drone so they can get back into the race.

Stopping/Resetting the Race

To stop and reset the race, press the STOP/RESET button. This will stop the race timer and reset it back to two minutes.
